SUMMARY

Aspiring Data Analyst with hands-on experience in Excel, Power BI, SQL, and Python (Pandas, NumPy). Skilled in data cleaning, analysis, and visualization using plots. Strong foundation in Statistics and Probability. Familiar with exploratory data analysis (EDA), problem-solving, and presenting insights in a business-friendly format. Eager to apply analytical thinking and technical skills to support data-driven decision-making.

SKILLS

Data Tools: Power BI, Excel (Pivot Tables, Power Query, Dashboarding)

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (Joins, CTEs, Window Functions)

Database: SQL Server, PostgreSQL

Statistics & Probability: Descriptive Stats, Probability Distributions, Central Limit Theorem, Correlation, Regression

Soft Skills: Problem-solving, Data Storytelling, Communication

EDUCATION

Prof. Ram Meghe Institute of Technology and Research, Amravati

December 2021 - July 2025

BE in Electronics and Telecommunication Engineering - CGPA 6.64/10

Gunjkar Commerce and Science Junior College, Khamgaon

July 2019 – August 2021

Higher Secondary Certificate – PERCENTAGE 85.83%

EXPERIENCE

Data Analyst Intern | Unified Mentor Pvt Ltd | July 2025 – Sept 2025

- Assisted in analyzing sales trends and customer churn using SQL and Python.
- Designed visual reports using EDA for business insights and presentations.

PROJECTS

Project 1: NHS Waiting List Insights – End-to-End Power BI Dashboard 🌐

- Delivered a multi-level dashboard enabling operational managers and executives to track KPIs.
- Increased stakeholder engagement by 40% by monitoring Power BI Service iterating layout and bookmarks.
- Published and shared via Power BI Service with role-based access (RLS), default landing pages.
- **Tech Stack:** SQL and Power BI

Project 2: Sales Data Analysis using Excel 🌐

- Collected, cleaned, and structured retail sales data, resolving missing values and standardizing categories for accurate analysis.
- Analyzed regional performance using PivotTables, slicers and charts to surface top-selling regions
- Built an interactive Excel dashboard with KPI cards and drill filters to enable quick, repeatable reporting.
- **Tech Stack:** Excel (PivotTables, Power Query, Charts, Macros), SQL.

Project 3: Supply Chain Management using EDA 🌐

- Conducted data cleaning, preprocessing, and statistical analysis using Python.
- Identified 15% potential reduction in delivery delays by analyzing lead-time data and supplier reliability scores using Python and Pandas.
- Created interactive visualizations to identify trends, inefficiencies, and optimization opportunities in the supply chain.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly.

CERTIFICATION

- **Data Analyst Intern, Unified Mentor Pvt Ltd** 🌐
- **2025 Masterclass on Data Science using Python A–Z for ML (Udemy Certification)** 🌐
- **Data Analytics and Visualization Job Simulation.** 🌐
