SUMMARY

I am Aspiring Data Analyst with hands-on project experience by using Python, SQL, Excel, and Power BI. Experienced in cleaning and organizing data, performing EDA, and visualizing insights for reporting. Enjoys working with data to understand trends, answer business questions, and support teams in making informed decisions.

SKILLS

Data Tools: Power BI, Excel
Programming Languages: Python, OOPS, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, Web Scrapping, PySpark, SQL
Database: SQL Server, PostgreSQL
Statistics & Probability: Descriptive Stats, Probability Distributions, Central Limit Theorem
Soft Skills: Problem-solving, Data Storytelling, Communication

EDUCATION

Prof. Ram Meghe Institute of Technology and Research, Amravati December 2021 - July 2025

BE in Electronics and Telecommunication Engineering - CGPA 6.64/10

Gunjkar Commerce and Science Junior College, Khamgaon July 2019 – August 2021

Higher Secondary Certificate – PERCENTAGE 85.83%

EXPERIENCE

Data Analyst Intern | Unified Mentor Pvt Ltd | July 2025 – Sept 2025

- Responsible for Cleaned and prepared transactional data using Excel and Python, improving accuracy and consistency for analysis and reporting.
- Created dashboards and reports in Power BI that highlighted performance trends and supported better data-driven decisions across the team.

PROJECTS

Project 1: Sales Data Analysis using Excel

- Collected, cleaned, and structured retail sales data, resolving missing values and standardizing categories for accurate analysis.
- Analyzed regional performance using PivotTables, slicers and charts to surface top-selling regions
- Built an interactive Excel dashboard with KPI cards and drill filters to enable quick, repeatable reporting.
- **Tech Stack:** Excel (PivotTables, Power Query, Charts, Macros), SQL.

Project 2: NHS Waiting List Insights – End-to-End Power BI Dashboard

- Delivered a multi-level dashboard enabling operational managers and executives to track KPIs.
- Increased stakeholder engagement by 40% by monitoring Power BI Service iterating layout and bookmarks.
- Published and shared via Power BI Service with role-based access (RLS), default landing pages.
- **Tech Stack:** SQL and Power BI

Project 3: Supply Chain Management using EDA

- Conducted data cleaning, preprocessing, and statistical analysis using Python.
- Identified 15% potential reduction in delivery delays by analysing lead-time data and supplier reliability scores using Python and Pandas.
- Created interactive visualizations to identify trends, inefficiencies, and optimization opportunities in the supply chain.
- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly.

CERTIFICATION

- **Data Analyst Intern, Unified Mentor Pvt Ltd**
- **Data Analytics and Visualization Job Simulation (Deloitte).**
